

ABSTRACT

Systems and methods are provided for transacting credit card payments, and reconciling inventory and cash transactions on moving vehicles, such as, in one embodiment, a passenger aircraft in-flight. The system employs a portable device for completing remote point of sale (POS) transactions. In one embodiment, the portable device is a personal digital assistant (PDA). The system includes an Internet portal in communication with a database for entering and storing pre-sale and post-sale transaction and inventory information, which may be used for reconciliation purposes, among other things.
